

Roller Blinds Information Sheet

From the affordable ranges, contemporary design, to the extensive range of fabrics and colours in room darkening, light filtering and light/heat control, we are sure you will find the Roller Blind just for you.

The Roller blind system can either be single blind design, or a Double Roller blind, where you have a room darkening and a light filtering blind in one window, maximising your daytime privacy and natural light, along with your room darkening for your night time privacy and light control.

If you don't like the look of our select range of Roller Blind fabrics, you have the option to make your blind truly unique to you, and your home, by selecting one of our curtain fabrics to be bonded to the Roller Blind. This option is great for those who want to add a unique finishing touch to their home.

All Roller blinds are chain controlled, as our standard, all chains are securely fastened with a child safety clip, to ensure maximum safety at all times.

For the larger windows, or for sliding doors, you have the option of having the blinds split into panels to best suit your window, with a link system. A link system is where 2 blinds operate and share 1 control. For any high up, hard to reach windows we also offer motorisation on your Roller Blinds, to ensure ease of use.

With the Roller Blind system they can be made for most window sizes. The blinds are made with a heavy duty tube which means they are designed to last. Roller blinds are a practical and versatile window covering solution, and with our experienced sales consultants we are sure to achieve the look you desire.

Turn Around Time: 4 Weeks approx. Depending on fabric stock.

Please note this is a guide only and is subject to change.
