

Roller Shutters Information Sheet

Roller Shutters are lightweight yet extremely strong, they offer Insulation, Noise and Light Control, Privacy and the easy operation makes these an ideal outdoor blind.

The Roller Shutters have a thermal insulation that reduces the effects of the heat in summer as well as retaining the warmth of your home in the colder months. The best part of owning Roller Shutters is the heating and cooling bills reduce all year round, making these an ideal long term investment.

Roller Shutters have an overall affect in the reduction of outdoor noise entering your home, along with light and ventilation, Roller Shutters can be easily adjusted to create a soft, pleasant atmosphere. With Roller Shutters you have the peace of mind of knowing you are in complete control of the amount of light entering your home. The added benefit of having Roller Shutters is that they minimise fading on your soft furnishings and protect your window frames from the weather.

Roller Shutters offer privacy during both day and night, and the ease of control adjusting the light exposure in your home. When you have your Roller Shutter completely open you have full access and view of your windows, as though you have no blind fitted.

You have 2 operations available to select from, you are sure to find the right style for your needs. All control operations allow you to control your outdoor Roller Shutter conveniently from the warmth of your home.

General Turnaround is approx. : 4 Weeks - This is to act as a guide only and is subject to change. This turnaround is from the date the check measure has been completed.
