

Shutters Information Brochure

Basswood Shutters

This fabulous style of window furnishing is stylish and contemporary; it can give any property a classic, elegant finish. With the wide variety of colours available, 11 painted and 12 stained, we are sure you will find the colour just for you. There are 3 louvre widths available for your convenience: 63mm, 89mm & 114mm. The louvre shape is elliptical and this allows an ease of movement, without sharp edges.

The best part of owning Shutters is the ease of mind knowing that these blinds are child safe. They also have the added benefits of being easy to clean and maintain, durability, strength and the fact you can install them on basically any window shape.

The minimum width that any one panel can be is 900mm (Hinged). For sliding doors you have 2 options, the bi-folding option, along with the sliding option. The Bi-Folding style folds back panel by panel, stacking into the room, and maximises the opening of the door way, letting lots of natural light in. The sliding option essentially creates sliding panels that slide either way, like a glass sliding door. This style is best suited for the space wary.

P.V.C Shutters

Our specialty range of PVC Vivid Shutters are made from a Thermo Polymer composition, which makes them Bathroom and Wet Area safe. The Vivid Shutter range can be used for both internal and external use. They are a creative, slim and elegant addition to any home, with the additional benefits of being easy to clean/maintain, child safe and they have a longer life span than most other shutters and they are insulating too. The louvres have been specially designed, with a reinforced core, to have that added stability in the louvres, to minimise any bowing. This feature comes standard with all louvre widths.

The Vivid Shutters have a specialty range of 3 colours to select from: Bright White, White & Pearl. There are 3 blade sizes available to select from: 64mm, 89mm & 115mm

Additional information:

The Vivid Shutter range can offer up to 70% more insulating benefits in your home, which means you can reduce those heating and cooling bills.

Shutters are the recommended product for bay windows.

Minimal Shutter width: 250mm

If you want this classic, clean look but don't want any more rods blocking your view you can have your tilt rod hidden, or centred to the window frames, or even off centred. The options are endless with Basswood & P.V.C Shutters.
